Funkcionalnost

- **Početna stranica** - nudi login pomoću korisničkog imena
- **Favoriti**
 - svaki od njih mogu kliknut za pogledati detalje
 - moguće unbookmarkati film pa on nestane sa liste
- **Pretraga** - omogućuje pronaći filmove prema nazivu
 - za razliku od favorita nudi i dodavanje i uklanjanje iz favorita
- **Detalji filma**
- ***Pregled profila – pomoću direktnog linka (opcionalno)***

Implementacija

- **Autorizacija** pomoću servera
- **Favoriti** – spremaju se u bazi za pojedinog “korisnika”
- **API za filmove** - *<http://omdbapi.com>*

Savjeti

- prije početka kodiranja
 - raspodijelite posao unutar tima
 - uspostavite način djeljenja koda za dijelove na kojima radi više osoba (npr. git)
 - razmislite o generalnoj strukturi oba dijela aplikacije
 - dogovorite način komunikacije između React i Express aplikacije
- uštedite vrijeme sa reuseanjem komponenti ili servisa
- ostavite dizajn za kraj
